

The 21st Course for Academic Development of Psychiatrists (CADP)

The Course for the Academic Development of Psychiatrists (CADP) was designed and started by Professor Norman Sartorius, and introduced in Japan in 2002 by Professor Mitsumoto Sato, (then President of the Japanese Society of Psychiatry and Neurology). The aim of this course is to develop the professional and leadership skills of young psychiatrists. The course was further developed by the Japan Young Psychiatrists Organization (JYPO). The initial six-year period CADP brought together young psychiatrists from Japan. And from then on, JYPO invited young psychiatrists from overseas to participate in the course.

We have various effective programmes to stimulate the interests of all participants. There are various lectures by famous leading authorities in the world, including Prof. Sartorius. Every participant is required to either give an oral or a poster presentation and can receive in-depth feedback on how to improve their presentations from using a pointer to clarifying the main message. Small Group Work is also an exciting program. All participants are divided into small groups and discuss a certain theme during these three days. The theme varies from year to year like treatment gaps, postgraduate training, disaster psychiatry, and how to make a proposal in order to diminish suicide.

Another unique point of CADP is that all participants, regardless of nationality, stay in the same hotel throughout the programmed schedule, and have all meals and parties together. It greatly stimulates our communication and contributes to our bonding.

The 21st CADP will take place in Hyogo, Japan on March 8-10, 2024. We JYPO would like to welcome young psychiatrists from overseas to the 21st CADP, for the further development of our collaboration and friendship. We are looking forward to seeing you at the 21st CADP.
